

[Engineered Cost Savings Success Story](#)

\$150,000 Program Savings Replacement of Weld Studs with Staked Studs

Problem/Solution: PSS Engineering proved through prototyping and development that the cost drivers related to process variation with Weld Studs could be eliminated. Perfection's assembly department was able to provide a stable alternative with lower cost components for a **Studded Stamping**. As a result, Perfection was able to offer an **annual cost savings equal to \$30,000 per year for the five-year program.**

Benefit: Program savings provided to our customer equaled \$150,000.
