Engineering Department

Project Engineer/Manager

We seek an experienced project manager that will be involved with the manufacture of metal spring and stamping products from cradle to grave to ensure financial success. Serves as the primary engineering contact with designated customers and is accountable for the overall profitability or cost effectiveness of assigned parts and assigned projects.

The successful incumbent will follow all company standard operating procedures and ensures that quality, efficiency and effective methods are major points of focus in satisfying the above responsibilities and accountability.

Job Requirements and Specifications include, but are limited to:

- Broad knowledge of a discipline, such as mechanical engineering, in a combination of experience, education and training equivalent to a Bachelor's degree.
- A minimum of four years experience in a metal stamping manufacturer environment.
- Knowledge of stamping and/or spring manufacturing processes required.
- Systems proficiency in MS Office Suite, Manufacturing systems, Auto-CAD and/or Solidworks.
- Strong communication skills; verbal and written.
- An understanding of the automotive industry a plus.
